Profile

Java Full-Stack Developer with practical experience in developing modern web applications using Spring Boot and React. Strong knowledge in building REST APIs, database integration, and working in agile environments. Hands-on experience gained through internship and freelance projects.

Professional Experience

Freelance Java Full-Stack Developer

02/2024 – 04/2026

- **About Music in Movies** - blog platform with Spring Boot REST API, React frontend, JWT authentication, role-based access for Admin, Author, and User, rich text editing, categories, tags, comments, and video embedding.
- **Ecommerce Shop** - full-stack online shop with a React and TypeScript frontend, a Spring Boot API, product browsing, user registration and sign-in, a shopping cart, checkout, and order history backed by a persistent H2 database.
- **Task Manager** - full-stack task management application combining React and TypeScript with a Spring Boot API. Features JWT authentication, task creation and editing, status and priority filters, search, and a single Docker deployment.
- **FitTimer** - Fitness timer app focused on a simple, usable workout flow with interval timing, configurable work and rest periods, mobile-friendly layout, and a lightweight deployed experience.

Full-Stack Developer (Internship)

nvii-media GmbH, Halle (Saale), Germany

08/2023 – 02/2024

- Development and configuration of a Symfony-based portal
- Integration of backend APIs and optimization of server performance
- Collaboration in agile development processes (Scrum)
